§1. Amazon.com is a household name. Jeff Bezos started it in a garage in 1994. Bezos was born in 1964 when both his parents were still teenagers, and his father was a unicyclist in the circus. They divorced after a year. In 1968 his mother remarried and he was adopted by his stepfather, Miguel Bezos, a Cuban immigrant to the United States. Jeff learnt that he was adopted when he was ten.

§2. Bezos showed an early interest in science and technology. When he was a schoolboy he made an electrical alarm to keep his younger brother and sister out of his room. Later, he graduated in electrical engineering and computer science. He was working in a well-paid job in New York when he heard about the rise of Internet use by 2,300% in one year. However, flying objects are still a passion for him. Amazon is working on drones that can deliver orders in thirty minutes. He's passionate about exploring space Bezos has dreamt about space travel since he was a child.
